## Calculating your expenditure

Fill in how much you think you spend for each of the following categories. If it help to think about this in terms of weeks or months, that's fine, simply times these figures by 52 or 4 to obtain how much you will spend in a year. Be realistic, the government estimate that it costs, on average, £11,000 a year to be a student.

Expenditure	Per week	Per month	Per year
