## Calculating your income

Fill in the table below to calculate your income. You can fill this in by week, month or year which ever is easier to calculate, but make sure that you have a 'total' for the year. (To do this simply times weekly incomes by 52 and monthly incomes by 4)

Income	Per week	Per month	Per year
Student loan			
Tuition fee loan			
Higher education grant			
Maintenance grant			
Childcare grant			
Parent's learning allowance			
Disabled student's allowance			
Adult's dependants grant			
NHS bursary			
Long course loan			
Overdraft			
Term-time job			
Holiday job			
Parental support			
Other			
<b>Total</b>			

You may have to estimate how much you will earn in a job, so be realistic. You should be able to find out how much you will receive as loans, grants and bursaries from [www.studentfinancedirect.co.uk](http://www.studentfinancedirect.co.uk)
